Summary

Computer Science and Engineering graduate specializing in Artificial Intelligence and Machine Learning, with project and internship exposure to data preprocessing, feature engineering, model training, and evaluation. Built ML-focused academic projects involving medical-image parameter analysis and an AI-powered cooking assistant. Also experienced in application development and cloud deployment using AWS EC2 and Docker. Developing Python-based data science skills, with exposure to Pandas, NumPy, scikit-learn, data visualization, and Power BI.

Technical Skills

Programming & Data: Python, SQL, JavaScript, TypeScript, Java
Data Analysis: Pandas, NumPy, data cleaning and preprocessing, feature engineering, exploratory data analysis, data visualization
Machine Learning: scikit-learn, model training and evaluation, predictive modelling, classification fundamentals, deep learning fundamentals
Visualization & Reporting: Power BI, Matplotlib, Seaborn
Application Development: REST APIs, Node.js, React Native CLI; Flask/Django (currently learning)
Databases: PostgreSQL, MySQL
Cloud & Tools: AWS EC2, Docker, Git, GitHub
Foundations: Statistics fundamentals, object-oriented programming, DBMS

Experience

Brainery Tech Jun 2024 – Jul 2024
Machine Learning Intern *Coimbatore*
- Worked with datasets involving data preprocessing, feature engineering, model training, and evaluation.
- Performed dataset analysis and experimented with predictive machine learning models.
- Applied machine learning concepts to interpret model performance and explore data-driven problem solving.

DENDO Sep 2026 – Present
HR Executive (Full-time) *Bengaluru*
- Coordinate HR operations including recruitment, onboarding, employee records, attendance, payroll inputs, and employee lifecycle documentation.
- Collaborate with technical and business teams on product requirements, operational workflows, testing, and issue resolution for internal applications.

DENDO Mar 2026 – Aug 2026
Earlier Role / Internship *Bengaluru*
- Contributed to the development and deployment of Dendo People, an HRMS platform comprising an employee mobile application and web-based admin panel.
- Worked with React Native CLI, JavaScript, TypeScript, Node.js, and PostgreSQL for application features and backend integration.
- Used AWS EC2, Docker, Git, and GitHub for deployment workflows, configuration, and version control.
- Supported product testing, debugging, feature validation, and coordination between business and technical teams.

Inmakes Info Tech Pvt Ltd Oct 2025 – Feb 2026
Java Full Stack Development Trainee *Kochi*
- Developed practice applications using Java, Spring Boot, SQL, and REST APIs as part of full-stack development training.
- Practised backend workflows, database integration, debugging, and application testing.

Projects

Spinopelvic Parameter Detection | *Machine Learning, Medical Imaging* Dec 2025 – Jan 2026
- Developed a machine learning-based system to detect and analyze spinopelvic parameters from medical imaging data.
- Worked on dataset preparation, preprocessing, feature analysis, and model evaluation.

Cook Bot – AI-Powered Cooking Assistant Apr 2025 – May 2025
- Developed an AI-powered cooking assistant that provides recipe suggestions and cooking guidance based on user inputs.
- Integrated AI APIs to process user queries and generate contextual cooking responses.

DENDO Food Delivery App – ETA Prediction | *Python, Real-Time Data* 2026
- Worked on delivery ETA prediction using Python and real-time data to support estimated delivery-time calculations.

Dendo People – HRMS Mobile Application & Admin Panel Mar 2026 – Present
- Built and deployed an HRMS platform for attendance, leave requests, performance tracking, employee queries, and related workflows.
- Developed the employee application using React Native CLI, JavaScript, and TypeScript, integrated with Node.js and PostgreSQL.
- Worked with AWS EC2, Docker, Git, and GitHub to configure and deploy application infrastructure.
- Live on Google Play Store | Admin Panel

D-Events – Event Management Platform Aug 2024 – Sep 2024
- Developed an event management application using Java, Spring Boot, MySQL, HTML, CSS, and JavaScript.
- Implemented event creation and information-management workflows backed by a relational database.

Education

Sri Krishna College of Technology Oct 2022 – Apr 2026
B.E. Computer Science and Engineering (Artificial Intelligence & Machine Learning) *Coimbatore, Tamil Nadu*

Certifications

- **NPTEL – Data Science for Engineers**
- **Coursera – AWS Cloud Computing**

Achievements

- Shortlisted for the **Smart India Hackathon**.
- Won **1st Place – Men's Badminton Tournament, Coimbatore**, serving as Team Captain.
