Summary

Computer Science and Engineering graduate specializing in AI & ML with hands-on experience building and deploying mobile and web-based applications. Developed Dendo People, an HRMS platform with an employee mobile application and web-based admin panel, deployed using AWS and Docker. Experienced in React Native, Node.js, TypeScript, PostgreSQL, Git, and cloud deployment, with additional exposure to Java, Spring Boot, and machine learning.

Technical Skills

Programming Languages: JavaScript, TypeScript, Java, SQL, HTML, CSS
Mobile & Backend: React Native CLI, Node.js, Spring Boot, REST APIs
Databases: PostgreSQL, MySQL
Cloud & DevOps: AWS EC2, Docker, Git, GitHub
Core Concepts: Object-Oriented Programming, Data Structures & Algorithms, DBMS
Machine Learning: Data Preprocessing, Feature Engineering, Model Evaluation, Dataset Analysis, Deep Learning Fundamentals

Experience

DENDO Mar 2026 – Sep 2026
HR *Bangalore*

- Handled end-to-end recruitment activities across technical, marketing, customer support, and business development functions through both on-campus and off-campus hiring.
- Interviewed and evaluated **1,500+ candidates**, coordinating candidate screening, interview processes, and hiring activities.
- Independently developed **Dendo People**, an HRMS platform consisting of an employee mobile application and web-based admin panel for attendance, performance tracking, leave applications, and employee queries.
- Developed the employee application using **React Native CLI, JavaScript, and TypeScript**, with Node.js and PostgreSQL for backend services and data management.
- Worked with **AWS EC2, Docker, Git, and GitHub** for application deployment, configuration, and version control.
- Performed application testing, debugging, UI adjustments, issue resolution, and feature validation across DENDO products.
- Collaborated with business and technical teams to coordinate product requirements, development activities, testing, and implementation.

Inmakes Info Tech Pvt Ltd Oct 2025 – Feb 2026
Java Full Stack Development Trainee *Kochi*

- Developed practice applications using Java, Spring Boot, SQL, and REST APIs as part of full-stack development training.
- Worked with backend workflows, database integration, debugging, testing, and application development practices.
- Applied object-oriented programming and Java development concepts while building and testing application features.

Brainery Tech Jun 2024 – Jul 2024
Machine Learning Intern *Coimbatore*

- Worked with datasets involving data preprocessing, feature engineering, model training, and evaluation.
- Performed dataset analysis and experimented with predictive machine learning models.
- Applied machine learning concepts to understand model performance and data-driven problem solving.

Projects

Dendo People – HRMS Mobile Application & Admin Panel Mar 2026 – Sep 2026

- Built and deployed an HRMS platform consisting of an employee mobile application and web-based admin panel for employee management and HR workflows.
- Implemented workflows including attendance check-in/out, leave and permission requests, task tracking, HR queries, and notifications.
- Developed the employee application using **React Native CLI, JavaScript, and TypeScript**, integrated with Node.js and PostgreSQL.
- Configured and deployed application infrastructure using **AWS EC2, Docker, Git, and GitHub**.
- Live on Google Play Store | Admin Panel

D-Events – Event Management Platform Aug 2024 – Sep 2024

- Developed an event management application using Java, Spring Boot, MySQL, HTML, CSS, and JavaScript.
- Implemented event creation, event information management, and database-backed application workflows.
- Integrated backend services with a relational database to manage application data.

Cook Bot – AI-Powered Cooking Assistant Apr 2025 – May 2025

- Developed an AI-based cooking assistant that provides recipe suggestions and cooking guidance based on user inputs.
- Integrated AI APIs to process user queries and generate contextual cooking responses.

Spinopelvic Parameter Detection Dec 2025 – Jan 2026

- Developed a machine learning-based system for detecting and analyzing spinopelvic parameters from medical imaging data.
- Worked on dataset preparation, preprocessing, feature analysis, and model evaluation.

Education

Sri Krishna College of Technology Oct 2022 – Apr 2026
B.E. Computer Science and Engineering (Artificial Intelligence & Machine Learning) *Coimbatore, Tamil Nadu*

Certifications

- **NPTEL – Data Science for Engineers**
- **Coursera – AWS Cloud Computing**

Achievements

- Shortlisted for the **Smart India Hackathon**.
- Participated in the **National Level Badminton U-19 Championship**.
- Won **1st Place – Men's Badminton Tournament, Coimbatore**, serving as Team Captain.
